### Roadmap to a low-carbon future: Policy and finance for climate action

Summer Academy 'Energy and the Environment' 2018 22 – 27 July 2018 | Greifswald and Berlin | Germany

Climate change is more present and noticeable each day. The year 2017 was a record breaking year in higher temperatures, extreme weather events, and shrinking polar caps... The challenges are daunting!

Spurred by increased global awareness and advances in technology, international climate policy is finally gathering momentum. The Paris Agreement marks a clear acceleration in climate action, committing to keep global warming below 2 degrees by decreasing the use of fossil fuels, increasing renewable energy and by implementing adaptation and resilience measures. The climate pledges made by the international community, national governments and private actors must now be translated into meaningful action.

Finance is one of the key drivers of this much needed climate action. Now is the time for innovative, creative solutions to mobilise the necessary resources and trigger involvement from all levels of society: Governments, the private sector, communities and individuals.

The Summer Academy 2018 will sketch a roadmap to a low-carbon future: From the international climate policy framework, to national policy and finance lessons of the German energy transition, down to the different forms of climate finance and the participation of multi-level stakeholders.

The Academy features workshops, visits to a wind energy farm and a renewable electricity storage plant, a three-day conference program, networking events and a festive goodbye barbecue in Berlin.

#### Roadmap to a low-carbon future: Policy and finance for climate action

#### Summer Academy - Part I: Greifswald

Sunday 22 - Tuesday 24 July 2018

The Summer Academy 'Energy and the Environment' opens with a meet and greet at the University of Greifswald on Sunday 22 July, followed by a welcome dinner in the harbor of Greifswald.

On Monday morning the Academy will open with a short introduction into climate policy and the need to include multi-level stakeholders in finance and action.

A collaborative workshop will facilitate the exchange of international and interdisciplinary insights between Summer Academy participants and faculty.

The Academy will then visit a wind farm in Mecklenburg-Vorpommern, where participants have the chance to interview the operator and learn more about the German legal framework for remuneration of renewable energy and the im-

plications of grid congestion. After the wind farm the group will visit the beach at the Baltic Sea.

On Tuesday, the Academy starts with a lecture at the University on the rise of technologies such as power-to-gas, which in their novelty require policy support and financial incentives to achieve greater efficiency.

Such technologies are necessary in a low-carbon energy system, and this will be the focus of the Academy in the afternoon which features a visit to a power-to-gas plant where renewable electricity is converted to gas, which can be stored in the gas grid.

The Academy will then move on to Berlin, where an intensive three-day conference and workshop program starts on Wednesday.

#### Summer Academy - Part II: Berlin Wednesday 25 - Friday 27 July 2018

#### Registration

The Summer Academy 2018 'Roadmap to a low-carbon future: Policy and finance for climate action' will welcome 30 interdisciplinary participants working in the field of sustainability. Applicants must have relevant experience in the field, and are selected based on their interest in the program, as well as academic/professional achievements. The Academy aims to find a representative mix of disciplines, nationalities and gender.

The fees cover all workshops and conferences, lunch throughout the event, transport from Greifswald to Berlin (as well as transport in Greifswald to the wind farm and beach), the welcome dinner, and the festive barbecue on the last day of the Academy in Berlin.

Registration forms are available on our site: www.ikemsummeracademy.de/applications You can also write to us for an application form, comments or questions: summeracademy@ikem.de
